

Jewellery Holder

Items you'll need:

- One 2 litre bottle
- One 1 litre bottle
- Two 0.5 litre bottles
- Wooden skewer
- Scissors
- Sand paper
- A glue gun

1. Cut the bottles so that you are only left with the bases.
2. Sand the rim of the bases to make them smooth and prevent cutting yourself.
3. Turn the 2 litre bottle base upside down and glue the wooden skewer to the centre of it.
4. Apply glue to the sides of the other bottle bases and attach them to the skewer to complete the stand.

Alternatively, you can drill a hole in the bases of the bottle and put the skewer through but gluing is easier.
