

Carton Wallets:

Items you'll need:

- Juice/Milk Carton (1 litre)
- Cloth
- Scissors
- Template (Available on website)
- Butter Knife

1. Take the carton, and wash out any remaining contents.
2. Cut the top of the carton off, open it out.
3. Cut the sides of the carton, and cut around the base of the carton also. The carton should then be flattened out.
4. Wipe away any remaining contents with some tissue.
5. Cut out the template and tape the two sides of the template together.
6. Lay the template over the carton and roughly tape it down, so it stays in place.
7. Take the butter knife and scour along the dotted lines, and the outline of the template.
8. Take away the template and cut out the general outline of the wallet.
9. Fold along all the scoured lines that you've made earlier. You should end up with what looks like an accordion at the centre, and a flap on the other side.
10. Draw a rough circle on the flap of the wallet, and make sure it is slightly larger than the opening of the carton.
11. Cut out the circle you've drawn.
12. Place the flap over the opening of the carton and close it using the cap of the carton. The wallet should open and close with ease.
