

Coke Can Cookie Cutters:

Items you'll need:

- A can
- Scissors
- Glue
- Some sandpaper

1. Cut the can in half and remove the bottom and top of it until you are left with 2 strips.

2. Sand around the edges of the strips of the can to make it smooth and avoid cutting yourself.

3. Make the strips into any shape you want, e.g. a love heart, and glue into place.
